

FACULTY POSITIONS IN IMMUNOLOGY

The Institut de recherches cliniques de Montréal (IRCM) invites applications for Faculty positions in the field of Immunology. Expertise is sought in the areas of T cell, B cell, macrophage or dendritic cell biology, innate immunity, or antigen processing and presentation. Qualifications must include a Ph.D. or M.D. degree with significant postdoctoral experience. Senior scientists who have an already established research program or junior scientists who have recently completed postdoctoral training are encouraged to apply.

IRCM is a dynamic independent biomedical research institute located in the heart of Montreal, Canada. It is affiliated with the Université de Montréal and brings together some 35 independent P.I. scientists and over 140 graduate students and postdoctoral fellows. IRCM faculty has university appointments with Université de Montréal and/or McGill University. The IRCM offers state-of-the-art core facilities/services for molecular biology, transgenic and knock-out mouse work, histology, flow cytometry, proteomics, genomics, cellular imaging and BSL2/3 containment.

Please send your application including curriculum vitae, the names and addresses of three references, and an outline of your research program to:
