

CANADIAN SOCIETY FOR IMMUNOLOGY

Dear CSI Members:

This email is a call for nominations for the Cinader Prize. Hardy Cinader was a member of a small group of Immunologists that “founded” immunology in Canada in the 60’s. Dr. Cinader was a strong immunochemist, a strong person and a passionate patron of native Canadian art and artists. The prize is awarded to an Immunologist working in Canada who is an exceptional researcher and also has something extra. The extra could be teaching, art, outreach, writing, - nearly anything in which the researcher excels (is not average). Please send nominations including in the letter the exceptional abilities of the scientist nominated. The nominee must hold a current CSI membership (2014) in order to be eligible. A CV is not necessary as the adjudicating committee can use the web to obtain this information. The award is presented at the CSI meeting. Please send in the nomination before Oct. 18/13 to Lori Coulthurst at info@csi-sci.ca.

Jean Marshall
Chair, Cinader Award Committee

The following is a list of past winners:

- 2013 Michael Gold - When You Come to a Fork in the Road, Take it
- 2012 Paul Kubes - Imaging the Immune System in Blood Vessels: Seeing a Whole New World
- 2011 Michelle Letarte - Experiments and Adventures with Endoglin and Immunology
- 2010 Christopher Paige - Dancing with the Bees
- 2009 André Veillette - Signaling in the Immune System: T cells and Beyond
- 2008 Kent HayGlass - What is Normal?
- 2007 Rafik-Pierre Sékaly - Human Immunology: 15 years experience and an eternal challenge
- 2006 Chris Bleackley - Confessions of a Thanatologist
- 2005 Michael Julius - Une Histoire D'Amour
- 2003 Gillian Wu - G.O.D. is in the details: Life forces and the Generation of Diversity
- 2002 Linda Pilarski - Challenging the Status Quo: From Sombreros to Nanobiotechnology
- 2001 Bhagirath Singh - Life before signaling: peptides, microbes, and regulation of autoimmunity
- 2000 John Schrader - Science and Sunday afternoons: P-cells to proteomics
- 1999 Dean Befus - From worms to asthma: the road to little feG
- 1998 Jack Gauldie - From the Chicken to the Egg and with a Virus in Between
- 1997 Arnold Greenberg - The molecular basis of cell mediated cytotoxicity
- 1996 Peter Bretscher - Regulation of the immune response: the significance of quantitative and qualitative signals as physiological signs
- 1995 Dennis Osmond - A B-cell biography: the soil and the seed
- 1994 Tak Mak - And appear to be and appear not to be
- 1993 Tim Mosmann - T-cells and cytokines: why does the immune system have to be so complex
- 1992 John Bienenstock - From there to here
- 1991 Emil Skamene - Experiments of nature and natural resistance
- 1990 John Roder - The ghost of Metchnikov
- 1989 Rick Miller - T cell differentiation
- 1988 Alec Sehon - Tolerogenic derivatives of biologically active antigens for therapeutic intervention
- 1987 Hardy Cinader - Developmental change in the second half of life - challenge and opportunity
